The AMC205 is a four port Gigabit Ethernet AdvancedMC™ (AMC). VadaTech offers this product in a mid-height or full-height form factor based on the AMC.1 specification. The AMC205 provides four Gigabit Ethernet SFP ports accessible through the front panel. The ports have an option for either copper RJ-45 or fiber LC connectors. The LC connectors are available with either SX or LX transceivers. The SFP connectors allow the board to be uniquely configured to support a wide variety of system requirements.

Any combination of fiber or copper is allowed (i.e. 1 copper with 3 fiber, etc.).

VadaTech can modify this product to meet special customer requirements without NRE (minimum order placement is required).
