The AMC210 is a single-width, mid-height AdvancedMC™ (AMC) based on the AMC.1 specification. The AMC210 provides Dual 10 Gigabit Ethernet.

VadaTech AMC220 Network Interface Card (NIC) deliver high-bandwidth and industry leading 10GbE connectivity with stateless offloads for performance-driven server and storage applications. The AMC210 has support for hardware-based I/O virtualization which is complementary to Intel and AMD virtualization technologies.

The hardware-based stateless offload engines handle the TCP/UDP/IP segmentation, reassembly, and checksum calculations that would otherwise be under the host processor. These offload technologies are fully compatible with Intel I/OAT QuickData technology. The Dual port 10GBase-CX4 adapter enables connectivity over 20+ meters of copper cables. The active copper and active fiber cable solutions can reach up to 100m.

VadaTech can modify this product to meet special customer requirements without NRE (minimum order placement is required).
