

KEY FEATURES

- AMC.2 compliant (1000-BaseBX)
- GbE via SFP
- Dual Clock and Data Recovery (CDR)
- Fiber or Copper option
- OS support for:
 - OS independent

The AMC214 is a single-width, mid-height AdvancedMC™ (AMC) based on the AMC.2 specification (full-height option available). The AMC214 provides Dual Gigabit Ethernet via SFP.

VadaTech AMC214 converts ports zero and one which are 1000-baseBX for GbE applications to SFP. This allows the ports to be uplink to other systems via front panel Fiber or Copper.

The onboard Dual Clock and Data Recovery eliminates jitter transfer as well as amplification of the signal.

VadaTech can modify this product to meet special customer requirements without NRE (minimum order placement is required).
