The ports 2-3 are routed directed between the two slots or to dual 2.5” disk. The AMC.2 (ports 0 and 1) are routed to the on board GbE switch.

The Air Filter and Fan Trays are hot swappable. The VT856 has option for AC or DC input. The power supply is removable for ease of service.

The VT856 has Dual 2.5” SATA/SAS disk that are removable from the rear. The dual disk could run as dual independent disk or as RAID zero/one. The Disk interfaces to the AMC slots via the PCIe Gen2 (Gne1) or direct connect via ports 2 and 3 of the AMC.

The VT856 runs VadaTech proven second generation Management software based on it’s VT002 product. The shelf manager implements IPMI management, FRU management, and shelf environment management for power, thermal, E-keying, etc. The VT002 can run as the Shelf/MCMC or MCMC.

The input power is universal AC (110-240VAC) or from DC (-36V to -75V).

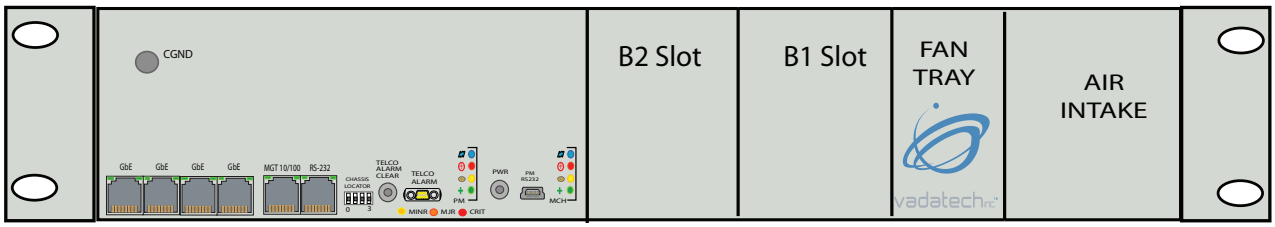
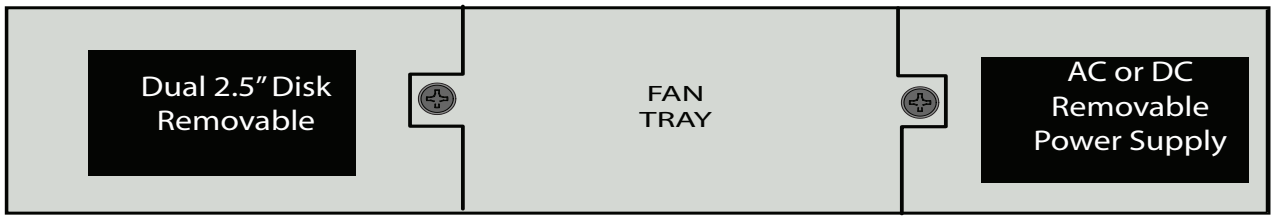
Front

The front I/O has an out of band 10/100 Ethernet which interfaces to the Shelf Manager/MCMC directly. Further the front also provide Serial interface (RS-232) to the Shelf Manger/MCMC, quad GbE link to the on board GbE Switch, Serial interface RS-232 to the power module, as well as provide status indication such as Telco Alarm, Health Monitoring LED, and Chassis locator.



Rear

The rear of the chassis has the AC/DC input supply, 2.5" hard drive, and the rear Fan Tray. All FRU in the back are removable for ease of serviceability.



Air flow

The air flow is from front to rear. The Air filter is removable from the front.
