

MEGAPAC L3

The MegaPAC L3 is a classic system at ACME Portable. With its power and displays, it was a popular mobile command control center used in emergency situations, simulations, and more. Nevertheless, there has been an increasing demand for a stronger system. As a result, now equipped with ultra HD resolutions, we have created the MegaPAC L3!

The MegaPAC L3 takes all the popular aspects of the FlexPAC III and makes it even bigger and better.

Triple Ultra HD Displays

The MegaPAC L3 comes with 3x Ultra HD displays for a massive combined 11620x6480 resolution (3840 x 2160 per display). See hidden and subtle details with these three beautiful and massive displays.

Multifaceted System

While the triple 4K displays are a key feature for the MegaPAC L3, it also comes with an impressive 7 full-length expansion slots. It can have up to 1TB of memory and 150 TB of storage. The MegaPAC L3 can be used in any situation for any applications.
