

ROCKY RK12

FULL-RUGGED 15.1" NOTEBOOK

The Rocky notebook with its outstanding IP65 protection concept, guarantees water and dust resistance even with uncovered interfaces and removed drives.

Only components with an extended temperature range are integrated in the Rocky notebooks. This allows the Rocky notebooks to be used in extreme temperatures and under the influence of extreme vibrations. The constant form factor in the 5th generation has served many customers for years showing the benefit of form, fit and function.

The Rocky RK12 is perfectly suited as a computer for installation in protected and armoured vehicles and aircrafts, with the addition of military connectors and suitable accessories – which is greatly appreciated by many users.
