SERVAL RD15-FHD-02
FULL-RUGGED 15.6" DISPLAY

All rugged roda RD series displays are MIL-STD810, MIL-STD461, and ≥ IP54 certified for use under almost all environmental conditions. As a standard model, they can operate under a temperature range of -20°C to +55°C. With its remote on/off function button/interface and metal housing, the RD series is particularly suitable when combined with a roda computer as well as for installation in protected and armoured vehicles and cabins that, due to space constraints, require a decentralised installation of computer and display. The system can be started at the touch of a button on the display. The perfect conditions for efficient operation!

The compact 15.6" Panel display RD15-FHD is available in different versions and can also be customised with military connectors. The displays with and without touch screen, high brightness, picture-in-picture, as well as blackout light and NVIS functionality are frequently used under tough conditions.

+ Full-HD LCD (1920x1080 pixel)

+ Typ. Brightness 800 cd/m²

+ **OPTIONAL:** resistve touch screen

+ IP65

+ MIL-STD-810G

+ MIL-STD-461G
