

# BL50S – Rugged Box PC for Storage Applications (AMD)

- **AMD Embedded G-Series APU**
- **RAID 0/1, hot-pluggable on 2 HDD/SSD shuttles**
- **4-port Gb Ethernet switch with PoE**
- **1 Gb Ethernet uplink**
- **1 PCI Express® Mini Card slot with 2 SIM slots for WLAN, GSM (2G), UMTS (3G), LTE (4G), GPS or GLONASS functionality**
- **2 slots for IBIS, RS232, RS485, RS422**
- **24 and 36 VDC nom. (10 to 50.4 V) class S2 PSU, with ignition**
- **-40 to +85°C operating temperature, fanless**
- **Conformal coating of internal components**
- **Compliant to EN 50155 (railways)**
- **Compliant to ISO 7637-2 (E-mark for automotive)**

The BL50S is a maintenance-free fanless box computer that has been designed for embedded storage applications such as content servers or video recorders. It offers two external SATA shuttles with hot-plugging support.

On the front of the rugged BL50S as many as 5 Gigabit Ethernet interfaces are accessible. Four of these ports share one Gigabit Ethernet port from the chipset via a switch, while one port is used exclusively as Gigabit Ethernet uplink. The four ports routed over the switch support Power-over-Ethernet.

One PCI Express® Mini Card slot with two SIM card slots offers the possibility to implement the wide range of functionality available on this form factor. This includes for example mobile service standards GSM (2G), UMTS (3G), LTE (4G) and derivatives, wireless communication standards WLAN / Wi-Fi IEEE 802.11 and derivatives as well as positioning systems GPS or GLONASS.

The BL50S is powered by an AMD Embedded G-Series APU (Accelerated Processing Unit), the T48N, running at 1.4 GHz. The G-Series combines low-power CPUs and advanced GPUs, in this case an AMD Radeon™ HD 6310, into a single embedded device. The use of the

Embedded G-Series makes for high scalability in CPU (single/dual core) and graphics performance (various Radeon™ GPUs or none at all).

The BL50S is equipped with 2 GB of DDR3 SDRAM and offers SD card and mSATA slots. The system is designed for fanless operation at temperatures from -40 to +70°C (+85°C for up to 10 minutes), its special aluminum housing with cooling fins serves as a heatsink for the internal electronics and in this way provides conduction cooling.

The BL50S supports one DisplayPort® interface with a resolution of 2560×1600. In addition, a multitude of other I/O is available at the front panel, including two USB 2.0 and variable slots for legacy serial I/O (e.g. RS232) or CAN bus.

The BL50S comes with its own integrated class S2 wide-range power supply with 24 and 36 VDC nominal input voltage (10 to 50.4 V) and a power consumption of 30 W and is in compliance with EN 50155 and ISO 7637-2 (E-mark for automotive). The power can be switched on and off using an ignition signal on the power connector, and a run-down time after switching off the power can be adjusted by software.

The combination of the various CPU/GPU options with the available selection of external interfaces makes for an extremely flexible system design that can quickly be tailored to a vast number of applications.

## Diagram

- ① PSU connector (10V-50.4V)
- ② 2 Hard Disk Shuttles
- ③ 2 SA-Adapter cutouts for RS232, RS485/422, CAN, IBIS master, IBIS slave or GPIO
- ④ 1 DisplayPort
- ⑤ 2 USB 2.0
- ⑥ Earthing Stud
- ⑦ 5 Gigabit Ethernet (4-port Ethernet switch and one uplink port)
- ⑧ 2 antenna connector cutouts for PCI Express Mini Card
- ⑨ Cutout for HD Audio

	<b>0780-0005</b>	DisplayPort® to DVI-D adapter, 20 cm
	<b>0780-0006</b>	Active DisplayPort® (DP) to single link DVI-D adapter, 20cm, max. resolution 1920x1200, AMD / ATI Eyefinity technology
	<b>0781-0002</b>	HF antenna cable with U.FL connector to RP-SMA connector, 200 mm
<b>Software: Linux</b>	This product is designed to work under Linux. See below for all available separate software packages.	
	<b>13MD05-90</b>	MDISS System (and Device Driver) Package (MEN) for Linux. This software package includes most standard device drivers available from MEN.
	<b>13MM02-90</b>	Linux driver (MEN) for RX8581 real-time clock for CB70C, F75P, MM2, SC24, SC25, BC50M, BC50I, BL50W, BL50S, BL70W and BL70S. Please note that this driver is already included in upstream Linux kernels starting from 3.14!
	<b>13SC24-90</b>	Linux I2C controller driver (MEN) for SC24, AE51, BC50M, BC50I, BL50W and BL50S
	<b>13SC24-91</b>	Linux tool (MEN) for UART mode setting for SC24, SC25, BC50M, BC50I, BL50W, BL50S, BL70W and BL70S
	<b>13T026-90</b>	Linux GPU and chipset driver (AMD) for BC50M, BC50I, BL50W, BL50S, SC24 and G214
	<b>13Z016-06</b>	MDISS driver (MEN) for 16Z029_CAN (CANopen master)
	<b>13Z100-91</b>	Linux FPGA update tool (MEN)

# Ordering Information

<b>Software: Windows®</b>	This product is designed to work under Windows®. See below for all available separate software packages.	
<b>10F014-78</b>	Windows® XP Embedded BSP (MEN) for F11S, F14, F15, F17, F18, F19P, F21P, G20, XM1, XM1L, XM2, MM1, MM2, DC1, DC2, DC13, RC1, BC50I, BC50M, BL50W and BL50S	
<b>10Y000-78</b>	Windows® Embedded Standard 7 BSP for F19P, F21P, F22P, F23P, G20, G22, CB70C, CB70, XM2, MM2, BC50M, BC50I, BL50W, BL50S, BC70M, BL70S, BL70W, BL70E, DC2, DC13, F205, F206, F210, F215, F216, G215, P506, P507 and P511	
<b>13SC24-77</b>	Windows® Installset (MEN) for SC24, SC25, BC50M, BC50I, BL50W, BL50S, BL70W and BL70S (Includes all free drivers developed by MEN for the supported hardware.)	
<b>13T010-70</b>	Windows® 32-bit network driver (Intel®) for XM1, XM1L, XM2, MM2, CB70C, F11S, F18, F18E, F19P, F21P, F22P, G20, G22, GM1, GM2, GM3, G211, G211F, SC24, BC50I, BC50M, BL50W, BL50S, BL70W and BL70S	
<b>13T020-70</b>	Windows® 64-bit network driver (Intel®) for F18, F18E, F19P, F21P, F22P, G20, G22, GM1, GM2, GM3, G211, G211F, XM2, CB70C, SC24, BC50I, BC50M, BL50W, BL50S, BL70W and BL70S	
<b>13T025-70</b>	Windows® XP GPU and chipset driver (AMD) for BC50M, BC50I, BL50W, BL50S and SC24	
<b>13T026-70</b>	Windows® Vista™/7/8 GPU and Chipset Driver (AMD) for BC50M, BC50I, BL50W, BL50S, SC24 and G214	
<b>13T037-70</b>	HD Audio Driver (VIA) for SC24, SC25, BC50M, BL50W, BL50S, BL70W and BL70S	
<b>13Y018-70</b>	Windows® 64-bit FPGA update tool (MEN)

*The date of issue stated in this data sheet refers to the Technical Data only. Changes in ordering information given herein do not affect the date of issue. All brand or product names are trademarks or registered trademarks of their respective holders.*

*MEN is not responsible for the results of any actions taken on the basis of information in the publication, nor for any error in or omission from the publication.*

*MEN expressly disclaims all and any liability and responsibility to any person, whether a reader of the publication or not, in respect of anything, and of the consequences of anything, done or omitted to be done by any such person in reliance, whether wholly or partially, on the whole or any part of the contents of the publication.*

*The correct function of MEN products in mission-critical and life-critical applications is limited to the environmental specification given for each product in the technical user manual. The correct function of MEN products under extended environmental conditions is limited to the individual requirement specification and subsequent validation documents for each product for the applicable use case and has to be agreed upon in writing by MEN and the customer. Should the customer purchase or use MEN products for any unintended or unauthorized application, the customer shall indemnify and hold MEN and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim or personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that MEN was negligent regarding the design or manufacture of the part.*

*In no case is MEN liable for the correct function of the technical installation where MEN products are a part of.*
